### PROPERLY DIRECTED SHADE MAKES YOUR HOUSE MORE LIVEABLE

In the Summer the sun sets in the northwest in the temperate zone. The hottest part of the day is in the early afternoon, when the more direct rays of the sun strike the roof of the house. Later in the afternoon, the rays pour directly on the west wall of the house, heating it to an uncomfortable degree.

A tree located to shade the wall and roof in the afternoon will keep house temperatures more comfortable. This helps to eliminate the well-known "attic furnace." By having a tree shade the west wall and roof of the house you will be protected from the hot sun when and where you most require such protection. Likewise, you can plant different kinds of trees, such as fruit, or other flowering trees around your property to give you shade where you want it, at the time of the year you most desire it.

**Daphne mezereum. FEBRUARY DAPHNE.** Upright branches thickly studded with delightfully fragrant, rose-purple flowers in February.

**YEW**

Upright Japanese Yews lend themselves ideally for use as accent points, for height at corners, for entrance groups, etc. The Spreading Japanese Yew has its many uses, especially where low growth is essential, such as under windows, at bases of terraces, low mass effects, and dressing off taller evergreens. Other forms, such as the low spreading English Yew (**Taxus baccata repandens**) and the Dwarf Japanese Yew (**Taxus nana**) create luxurious notes in any good evergreen planting.

**Thuja occidentalis pyramidalis. PYRAMIDAL ARBORVITAE.** This is one of the very best of the Arborvitaes. It is distinctly columnar in growth, while its glossy, dark green foliage is equally attractive both winter and summer. A formal plant, and fine for accents.

Ground Covering Plants

Just as their name implies, the following plants are suitable for covering the ground under trees and other places where grass won't grow. Although primarily foliage plants, some have blooms. Some have roots that spread and send up new top growth, some spread by sending out trailers that take root, and others merely grow more or less prostrate, spreading out as they enlarge to cover a greater area of ground each year.

- Euonymus (Evergreen Euonymus). See page 10
- Hedera helix (English Ivy). See page 34
- Lonicera halliana (Honeysuckle). See page 34
- Pachysandra terminalis (Spurge). See page 16

Evergreens are useful and attractive because of their stability and the color they lend to the winter landscape.

## Evergreen Hedges

From time immemorial people have used hedges and fences to protect their property from intrusion and to secure privacy.

### ARBORVITAE

**AMERICAN** (*Thuja occidentalis*) Upright growing type. Good foliage.

**DARK AMERICAN.** (*Thuja occidentalis nigra*). Rich dark green foliage; makes a full, compact hedge.

**Pyramidal.** Because of its shapely habit of growth and deep green foliage, this makes a very fine hedge.

Prices of above 3 varieties:

2½ to 3 ft.....	35.00	325.00
3 to 3½ ft.....	45.00	425.00

### HEMLOCK

The Hemlock hedge is ideal, and we recommend it as one of the most beautiful of evergreen hedges. Every year it grows increasingly beautiful. The Hemlock also grows well in shade, and lends itself nicely to shearing.

2½ to 3 ft.....	60.00	575.00
3 to 4 ft.....	85.00	800.00

### YEW HEDGES

Without doubt, this is the grandest of all the evergreens for hedges. In England and on the Continent, Yew hedges make up a large part of the charm of the landscape. The deep, rich, dark green foliage makes them a beautiful thing to behold. Plant a Yew hedge now and enjoy it all the days of your life.

"God made the Flowers to beautify  
The earth, and cheer man's careful mood;  
And he is happiest who has power  
To gather wisdom from a Flower,  
And wake his heart in every hour  
To pleasant gratitude."

— WORDSWORTH.

## Bulk's Hardy Roses

Roses—the mere name is an inspiration to garden lovers. Nothing can take the place of the Rose. Almost every home has room for at least a few. Roses will grow in any fertile soil, but are much improved in bloom, fragrance, and beauty by rich soil, liberal fertilizing, and good cultivation. Branches should be well cut back early each spring.

### THEY'RE WORTH IT

Systematic spraying of roses every two weeks after they come into full leaf, will prevent disease, black-spot, mildew and plant lice. Your reward is in clean foliage and beautiful blooms. We recommend TRIOGEN, see page 42.

### POTTED ROSES FOR SUMMER PLANTING

Most of the Roses offered here are available in pots for summer planting. Potted Roses give an immediate effect, and it is fun to select the plants in bloom to assure getting the colors you like.

During the season clumps of perennials will be available in metal containers.

Potted bedding plants, such as Geraniums, Ageratum, Petunias, and annual seedlings are available at our Retail Nursery Sales Store in the Spring.

Imported Tulips, Daffodils, Hyacinths and other Spring bulbs are on display in the fall.

It is pleasant to do your garden shopping at Bulk's.

**Climbing Roses** are easy to grow and can be used to provide a beautiful background for your garden. On posts, fences, walls, buildings or trellises they afford a glorious display of color.

Planted on steep slopes and pegged down they help to prevent soil erosion.

## Fruits

In the extremities of the lawn or upon the adjoining lot, plant fruit trees. They will bountifully reward you in the fruit they yield, which you will enjoy eating right from the trees or in winter as preserves and jam. The fruit-garden can easily be made a part of the scheme for beautifying your property. Flowers along the walk to the orchard will brighten the way and provide blooms for cutting.
